RE: THE 2022 INTERNATIONAL CONFERENCE: CALL FOR FULL PAPERS

This is a follow up to The 2022 International Conference held on 9th to 11th March, 2022. The earlier submitted abstracts for the conference were intended to facilitate the Power Point/Posters presentation and it was envisaged that drafting of manuscripts would follow after the conference for publication in recognised journals. The STEM-ID programme management committee (PMC) in consultation with the Chief Editor of the Journal of Building and Land Management (JBLM) agreed to publish the papers originating from the conference presentations in a special issue. Kindly, note that The JBLM is indexed with AJOL (Africa Journal on-line) and the editorial board is in the process of indexing the JBLD with the Directory of Open Access Journals (DOAJ).

The PMC plans to organize a writer's workshop to enable completion of the manuscripts for publication in the JBLD. Those interested to have their papers published in the special issue are invited to submit softcopy of their full papers before 30th April, 2022 to the following email address: arumarch2022conference@gmail.com. It is worth noting that the submitted manuscripts will form a basis for holding the writer's workshop where participants will be privileged to receive guidance on publishing from the Chief Editor of the JBLD.

Released by the Directorate of Postgraduate Studies, Research and Publications.
